

palestine:

a parched land

Since the dawn of the occupation of June 1967, the Palestinian people have been automatically sentenced to a "parched life". Israel has forcibly controlled all the water resources of the West Bank and Gaza Strip.

88% of all water in the Occupied Territories is *diverted* for Israeli use

In Gaza, Palestinians are *forbidden* from digging new wells on their own land. Meanwhile, Israeli settlers dig new wells at will.

Each Israeli settler in the illegal settlements in the Gaza Strip consumes **5X** as much water as each Palestinian.

In Hebron, where a settler population was planted in and around the city, **70%** of the water goes to an estimated **8,500** settlers. **30%** goes to the city's **250,000** Palestinian inhabitants.

Settlers receive water at *one-quarter* the cost to Palestinians. While the Palestinians thirst for potable drinking water, settlers enjoy *luxury hotels, swimming pools and manicured lawns*.

Help the Palestinian people quench their thirst for freedom.
